Customer Creation Failed Issue :

Actual Result: While attempting to create a customer using the following payload, the system returns a 400 error with the message:

"json: cannot unmarshal number into Go struct field Address.Address.PostalCode of type string"

The issue is that the backend is expecting the PostalCode field to be a **string**, but the payload is currently sending it as a **number**.

Payload :

Account Settings Updating Errors :

The screenshot shows the 'New Customer' form in the e-Invoice Solutions application. The form fields are filled with the following data:

- Customer Type: Business
- Legal Registration Name (Arabic): مجموعة باثوندارا
- Legal Registration Name (English): Maryam Super
- VAT Registration Number: 310131013111333
- Other Buyer ID Type: Commercial Re
- Other Buyer ID: 987654321
- Email Address: rihan0011@yop
- Phone Number: 0123456789

The 'Address' tab is selected, showing Building Number: 1000. The 'Save' button is highlighted. Overlaid on the right is a browser's developer console showing a network request to 'fetch/XHR'. The response is a JSON object with an error:

```

{
